The future is now.

STERILIZATION CENTER
New advancements in antimicrobial materials, combined with our industry leading design, make our ST Sterilization centers the most advanced units on the market.

STAGE 1 RECEIVING
- Designed for cassette use which requires 60% less linear counter space
- Upper Red Light Module is for soiled instrument holding
- Shelves are 1/4” Solid Surface materials
- Ample countertop area for handpiece maintenance systems
- Standard hands-free water activation, with large sink and pull out spray faucet
- Knee activated module offering a variety of regular, biohazardous, and sharps waste options
- Use of tabletop/built in ultrasonic or dishwasher system

STAGE 2 PREPARATION & PACKAGING
- Built-in side barriers protect materials during this key stage
- Barriers combined with standard solid surface counters form an anti-microbial area for the packaging process
- Convenient shelf houses cassette wrapping I.D. tape dispensers
- Accessible cassette wrap drawers with internal covers act as an additional work surface and storage for wrap materials
- Lower storage compartment with slide out drawer accommodates Statim drain bottle or available instrument dryer

STAGE 3 STERILIZATION
- Sterilizers have been located with ergonomics in mind
- 3 slide-outs in the tower section can accommodate any size sterilizer and Statim with convenient loading shelf
- Lower drawer is ideal for the storage of sterilization materials
- Unique chimney design with self contained exhaust fan ensures proper operating temperature for expensive equipment
- Access panel permits easy service entrance into chimney shaft

STAGE 4 STERILE CLEAN STORAGE
- Upper storage includes blue light module to signify items have been processed and are ready for use
- Upper storage modules provide sufficient storage for both trays and cassettes
- Lower utility drawers provide lots of storage for all your supplies

The ST Sterilization units are constructed from materials that inhibits growth of stain and odor causing bacteria, algae & fungi. The units are impervious to water damage. All contact points of the ST Sterilization center are constructed from a solid polymer material. This material has an antimicrobial agent bonded into the sheet at the molecular level. The result is a unit with an antimicrobial agent that will not leach into the environment and will remain active for the lifetime of the product.

The ST Sterilization Units stay cleaner, longer.

The ST Sterilization Unit is an improvement on already remarkable and industry leading Sterilization units; our core unit surpasses the latest CDC aseptic guidelines. We are offering an industry leading 7-YEAR WARRANTY on the ST Sterilization Units.

These units have been designed around the 4 stages of the Sterilization process as outlined by CDC. Our units are loaded with all the features to ensure an efficient and safe Sterilization process.
