# REAR CABINETS

Efficiency rules.

**MCC**  
Modular & Custom Cabinets

**TAILORED SOLUTIONS**  
**FOR YOUR DENTAL PRACTICE**

# We've got your back. Literally. Everything you need fits perfectly in our **Perfect Fit Rear Cabinets**. Designed with efficiency in mind.

Since the early days at MCC, we have continually collaborated with dental professionals on the design of practice cabinets. The result of our efforts is the most efficient treatment station available. Quite simply, our Perfect Fit Rear Cabinets are industry leading. Consider the following:

- The dentist, assistant and patient all benefit from having instruments and equipment close at hand and in just the right place.
- To maximize the functionality of our Rear Cabinets, every corner, shelf and position has been transformed into useful space.
- We have kept our rear cabinets to the smallest footprint possible, while still accommodating everything required for today's well equipped dental facility.
- Some of the key features of our rear cabinets include optional Solid Surface or Caesarstone® countertops, 2 mm edging, CPU storage in the upper cabinet, and medical grade outlets integrated into the mid-section. There are also various options for mounting a monitor.

Investing in well designed, high quality cabinetry today pays high dividends down the road, as practices evolve to meet new and ever demanding needs.

*Talk to our experts about any special features you may require. A few simple custom modifications are a cost effective way to guarantee the 'perfect fit' for your practice.*

**PFR8144**

### Key Features

- Optional solid surface or Caesarstone® countertop
